FND-XC100Vacuum cleaner

Road vacuum cleaner is used to the expressways, highways, municipalities, airports, residential, mining, power plants and other places of unable to provide power supply, such as road slotted irrigation and vacuuming operations, sanitation construction operations, power plant equipment ash operations.

Performance Advantage

1.Vacuum cleaner supporting high-quality vortex pump, smooth and quiet operation, small vibration, no tail gas, in the bar design on the improved, more durable, heavy load, the material is more convenient dumping, suction mouth diameter can be based on requires custom (Φ50mm-Φ100mm), can be professional with set in a variety of machinery and equipment industries.

2. Power source: petrol engine driven fan, suction is adjustable, depending on the power of the Honda gasoline engine, plus an oil can work continuously for 2 to 3 hours, and strong power.

3. Filter: using non-woven filter device (washable), the filtration precision reaches 0.3 um. FPPR material of the filter, filtration precision of 0.3 um, filter area is 28000㎡, can be washed.

4. The whole machine is made of 304 stainless steel material, compact design and easy to move.

5. The machine adopts the separable barrel, barrel wall smoothly easy to clean up, the separable barrel with a push hand to clearing up the rubbish conveniently, some parts and tools are placed in the box at he back of machine.

Technical Data

Model	Power source	power	engine oil	Fule capacity	Suxtion	Air volume	Dust collection capacity	Filter Surface	Noise	Dimensions (mm)
units	oil	W	L	L	Kpa	m³/h	L	cm²	dB	mm
FND-XC100	gasoline	9500	0.6	3.5	30	1000	100	28000	68	1400x1320x1600

Prduct Parts

76 diameter transparent steel pipe (5m)

76 caliber flat sucking mouth

76 caliber dust picking
